JUKI

*Maximize Efficiency and Quality Control
with GKG Screen-Printers.*

GKG screen printers boast a global reputation for high quality, long-lasting performance. Available in various sizes, they complement JUKI placement machines and reflow soldering ovens, enabling customized SMT solutions for PCBs of different sizes. Benefit from a sturdy, long-life machine design that delivers optimal results.

G-Titan

- Solder Paste Rolling Measurement.
- Stencil Lock.
- Flexible clamping with side and/or top clamp.
- Auto paste dispense with OPC squeegees.
- 2D PCB and Stencil aperture inspection.

P-MAXII

- Vision and Optics System
- Automatic PCB Thickness Control
- Individual front/rear, Self-Adjusting, Motorized Programmable Floating Print Heads
- Wiper System

P-Primo

- 2D Paste Inspection Standard.
- Stencil Apertures Inspection System. (option)
- SPI Closed-Loop. (option)
- Temperature, Humidity Monitoring & Display. (option)

P-LED

- SPI Closed-loop option
- Temperature, humidity monitoring & display option
- External Barcode Scanner for PCB Traceability option
- Handheld Barcode Scanner for stencil, solder paste, squeegee traceability option
